

## **ebm-papst A&NZ MD Simon Bradwell speaker at Pump Industry Australia Breakfast Meeting in Melbourne**

The Pump Industry Australia is holding its first breakfast function for 2012. The meeting will explore some of the major challenges facing Industrial businesses, as Australian companies deal with important issues such as:

- The rising value of the A\$
- Greenhouse gas emission reduction programs
- Improving productivity to remain competitive
- Skills shortages

Keynote Speaker is The Hon Richard Dalla-Riva MLC, Victorian Minister for Employment, Industrial Relations & Manufacturing, Exports & Trade.

Dr Simon Bradwell, Managing Director of ebm-papst A&NZ and President of the Fan Manufacturers Association will be speaking about the latest developments on MEPS for industrial fans.

Other speakers include Bou Spithoven, speaking about a small business showcase, and David Marshall, Managing Director at Performance Centre, on latest developments in sales force motivation and development.

**Date:** Wednesday, 21 March 2012

**Venue:** Carlton Football Club George Harris Room Visy Park, Royal Parade, Carlton North, Victoria

**Time:** 7.30am – 9.00am

**Pump Industry Australia** is a “not for profit” Association representing the interests for its members who participate in our Industry. From its early roots in 1963, when the Australian Pump Manufacturers Association was formed, the organisation has consistently adjusted its activities to take into account the changing nature of the Global pump market and its impact in Australia. To register or to obtain more information, please visit the PIA website <http://pumps.asn.au>.

**ebm-papst** manufactures pumps for various applications. Whether for beverage tapping units, washing machines, condensing clothes dryers, or other industrial applications, the ebm-papst production range includes special pumps for specific and defined application areas.

**Submersible circulation pumps** offer the highest performance and reliability for pumping low-viscosity media such as water, condensate or soap and water mixtures, or

for circulating coolants in beverage tapping units. Special versions with longer pump shaft, other mounting plates etc. are available on request.

**Dosing pumps** are the specialists for precision dispensing of high-viscosity media such as liquid detergent, fabric softener, oils, paints and lacquers, chemicals and so on.

ebm-papst have also made water their element – with a new, electronically operated water pump. The electric driven **cooling water pump KMP 20** incorporates the benefits of compact dimensions, low weight and smoothly and quietly operation. This canned motor pump with integrated ECU uses an external rotor where the impeller and plastic encased magnet are combined in one structure reducing the number of movable parts. More over the 20 Watt pump with optimised hydrodynamic design has a high working pressure of 0,35 bar, but needs 15% less power than comparable pumps. The range of allowable temperature is from -40°C to +120°C (short time 130°C).

### **About ebm-papst**

We are the leading global manufacturer and supplier of fans, blowers and air moving products and are the leader in energy-saving EC technology. We provide a unique range of air movement or specialist drives products. Our motor technology, engineering and logistics expertise will add value to your business.
