2017 New Zealand GreenDay

ebm-papst is hosting its 2017 New Zealand GreenDay on the 11th of October at the Pasifika Centre, in the North Campus of Manukau Institute of Technology, Auckland. The event, jointly organised by ebm-papst and Manukau Institute of Technology, commences at 9am and concludes at 2pm.

GreenDay is an initiative of ebm-papst, facilitating conversation about energy reduction and improved efficiencies. The idea was pioneered by trainees at ebm-papst acting as Energy Scouts, who emphasise that the intention of the one-day event is to commence the process of long-term sustainable action.

In its sixth year worldwide, it has grown to become a networking opportunity in Australia and New Zealand for HVAC&R consultants, facility managers, contractors, end users, building owners, business owners, apprentices and students.

The opening session, which features Martina Heine from ebm-papst A&NZ and Mike Hopkin from Energy Management Association of New Zealand, answers the question, "How can I apply energy efficiency?"

After morning tea, HVAC&R case studies on "Energy efficiency in action" will be presented by Greg Lewis from Countdown, Lance Jimmieson from Jackson Engineering, James Darby from Resource Data Management NZ, and Matthew Darby from Climate Control Companies Association NZ.

Drew Roberts from EECA Business and Chris Woods from Auckland University will be presenting on "Energy efficiency in your business" after a networking lunch.
